Qwiic Hub

333018

The Qwiic Hub expands your circuit with six Qwiic connectors, simplifying connections for faster prototyping.

Full product documentation, files and tutorials: solde.red/333018

CORE ATTRIBUTES

SKU 333018

WEIGHT 7 g

BARCODE 732388674602

DESCRIPTION

We made the Qwiic system for faster prototyping and easy connection between the components. However, some of the components have only one Qwiic port or you just want your cable management made better. What to do in those cases? The Qwiic hub comes to the rescue! It has six connectors so you can easily expand your circuit. It's as simple of a device as it can get.

Product usage tips: You can connect Qwiic devices to the hub like you would to any other Qwiic device. Just plug the preferred [Qwiic cable](#) into the hub and a device you're working with. That's all there is to it. You should avoid working with the hub in wet environments to ensure it lasts a long time. Be sure to watch the operating voltage of your circuit. Since the hub works on 3.3V, higher voltages can burn it and render it useless. There is a hole in the middle of the board so it can be secured to any surface.

TECHNICAL DETAILS

- **Operating voltage:** 3.3V
- **Connectors:** Qwiic x6
- **Mounting holes:** 1
- **Dimensions:** 39 × 34 mm / 1.5 × 1.3 inch
