DESCRIPTION

This heat shrink tubing set is a useful basic for working with wires and cables, whether you are doing electrical repairs or building DIY electronics projects. It comes in multiple colors and sizes for wires of different thicknesses. Just slide a tube over the wire or connection, apply heat with a heat gun or lighter, and it shrinks tightly into place, creating a snug insulated seal. This helps protect against exposed wires, moisture, and short circuits. With several diameters included, you can easily choose the right fit for anything from thin signal wires to thicker power cables, so it is a practical addition to any toolbox, garage, or workbench.

TECHNICAL DETAILS

The set consists of:

- 60 heatshrinks 40 mm / 1.6" long; 2 mm / 0.08" in diameter
